## CB SERIES CEILING BOXES

## FSR Metal Products Group

### DESCRIPTION

FSR is now providing solutions for your ceilings! Eliminate those unsightly equipment boxes hanging off the projector poles or mounted to your walls ruining the architect's design. These enclosures allow you to conceal your equipment neatly out of site behind a hidden door that allows you to insert matching ceiling tiles. Select from two size ceiling enclosures and numerous options to fit your application.

#### CB-12 – CEILING ENCLOSURE

Designed for classrooms, this 2'x1' enclosure provides an external AC receptacle on the ceiling surface, four (two duplex) additional un-switched AC receptacles inside the enclosure, two shelves to mount two half-rack control or AV equipment and knockouts to allow wiring. A white rim style door that you insert the ceiling tile into for a matching look is included. An optional fan kit and a variety of mounting kits are available.

#### CB-12P – CEILING ENCLOSURE with Projector Pole Mount

Same as above with the addition of an industry standard 1½" NPT fitting to hang up to a 50 lbs. projector (including mount accessory). This female pipe fitting can be located in multiple positions to optimize projector placement.

#### CB-22 – CEILING ENCLOSURE

Designed for classrooms, conference and meeting rooms with a projector and control equipment. This 2'x2' enclosure has ample room for two full rack pieces of equipment or four half-rack pieces on the built-in shelves. The unit includes an external AC receptacle and a switch/circuit breaker the on the ceiling surface, and five AC outlets ergonomically spaced to allow room for wall warts inside the enclosure. A white rim door that you insert a ceiling tile into for a matching look is included. An optional fan kit and a variety of mounting kits are available.

#### CB-22P – CEILING ENCLOSURE with Projector Pole Mount

Same as above with the addition of an industry standard 1½" NPT fitting to hang up to a 50 lbs. projector (including mount accessory). This female pipe fitting can be located in multiple positions to optimize projector placement.

#### CB-22S – SMART CEILING ENCLOSURE

The CB-22S is a "Smart Green Enclosure" features built-in projector state auto-sense which senses the power state of the projector to turn off remaining receptacles when the projector is turned off, thereby eliminating parasitic power consumption. The unit includes two monitored un-switched outlets, one on the ceilings surface for projector power. A main switch/circuit breaker and four switched AC outlets ergonomically spaced to allow room for wall warts. An integral fan is included. As options, the receptacles can also be triggered by a low voltage contact closure and switching power to all 6 outlets can be accommodated. A white rim style door that you insert a ceiling tile into for a matching look is included.

#### CB-22SP – CEILING ENCLOSURE with Projector Pole Mount

Same as above with the addition of an industry standard 1½" NPT fitting to hang up to a 50 lbs. projector (including mount accessory). This female pipe fitting can be located in multiple positions to optimize projector placement.

#### Mounting kit options (all models):

The CB-MNT1 mounting kit attaches to the four integral mounting tabs attached to the ceiling box exterior. The kit includes four 100" stainless steel cables and four Kwikloc cable adjusters.

The CB-THRD mounting kit accepts 1/4" and 3/8" threaded rod and includes four hanger brackets that mount to the ceiling box with included 1/4-20 hardware.

## APPLICATIONS

- Anywhere a Projector or Display is ceiling mounted
- Conference centers
